

Once the course is approved, you can schedule the Event. The Event lists the specific date, time and location for the single training event offered. Each time you offer the training, you would schedule an event. Although the scheduling of training events can be last minute, scheduling training events in The Registry must be completed in a timely manner. Best practice is to schedule training events in The Registry **BEFORE** the training event. However, The Registry recognizes there are some circumstances that occur which can make it challenging to meet this event scheduling deadline. To better align policy and procedure with best practice, past event approval will be limited to no more than **30 calendar days** passed the event date.
